

Kika

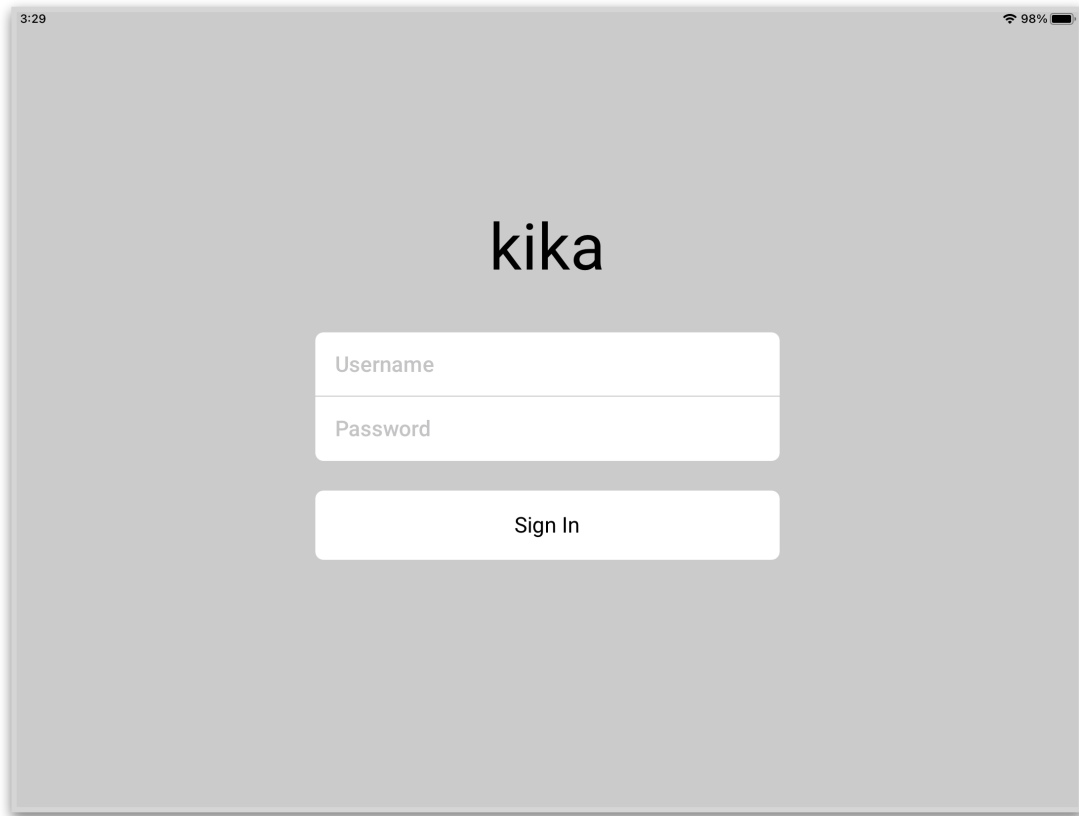

User Guide

Tablet Application

Foreword

A Better Way

We all know there has to be a better way than using pen and paper.

The available inventory apps are frustrating to use and take forever to complete.

That's why we built Kika. A system designed for removalists by a removalist.

This guide will show you how to use the magic of Kika to get through the inventory process faster than ever before.

Team Kika..

Kika Basics

Move Screen

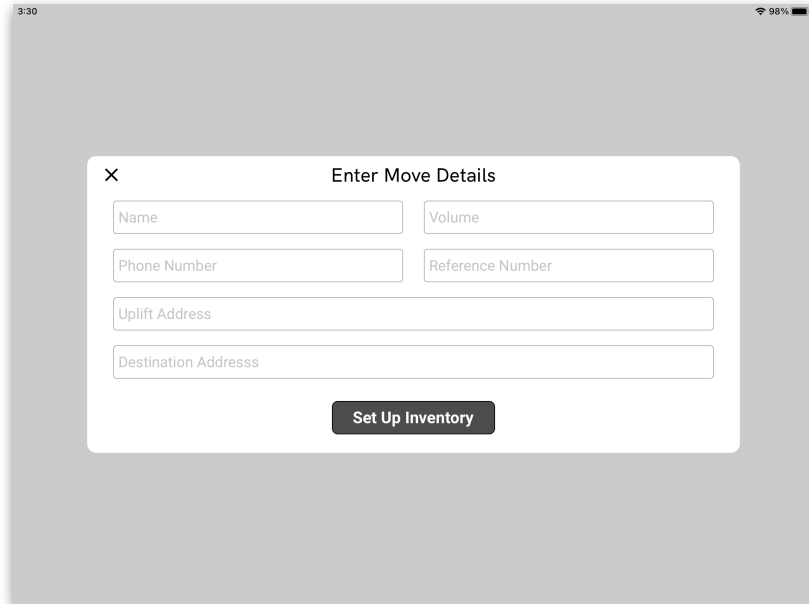

Your login details will be provided by your office. After logging in, you are taken to the Move Screen. You can set up your moves manually or if your office has created the job already add the move reference number to move on.

1. **Set Up An Inventory** : Tap this to create the job on the tablet.
2. **Delivery Outturn** : Tap this to create a delivery outturn report. This option can be used to help with checking off an invent that has been done on paper.
3. **Move Ref Number Field** : Enter your move number here if it has already been set up by your office.
4. **Go** : Tap this button after entering the move number to proceed.
5. **Log Out Button** : There is no need to log out unless you need to use different login details.

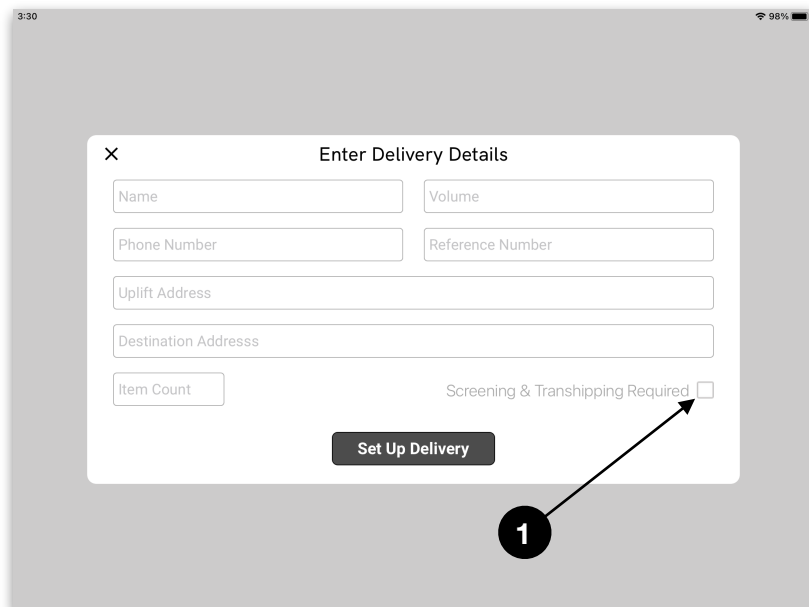

Kika Basics

Set Up Inventory Screen

A screenshot of a mobile application interface showing a form titled "Enter Move Details". The form has a close button (X) in the top left corner. It contains five input fields: "Name", "Volume", "Phone Number", "Reference Number", "Uplift Address", and "Destination Address". Below the fields is a dark button labeled "Set Up Inventory". The background is a light gray with a dark gray border.

Set Up Delivery Outturn

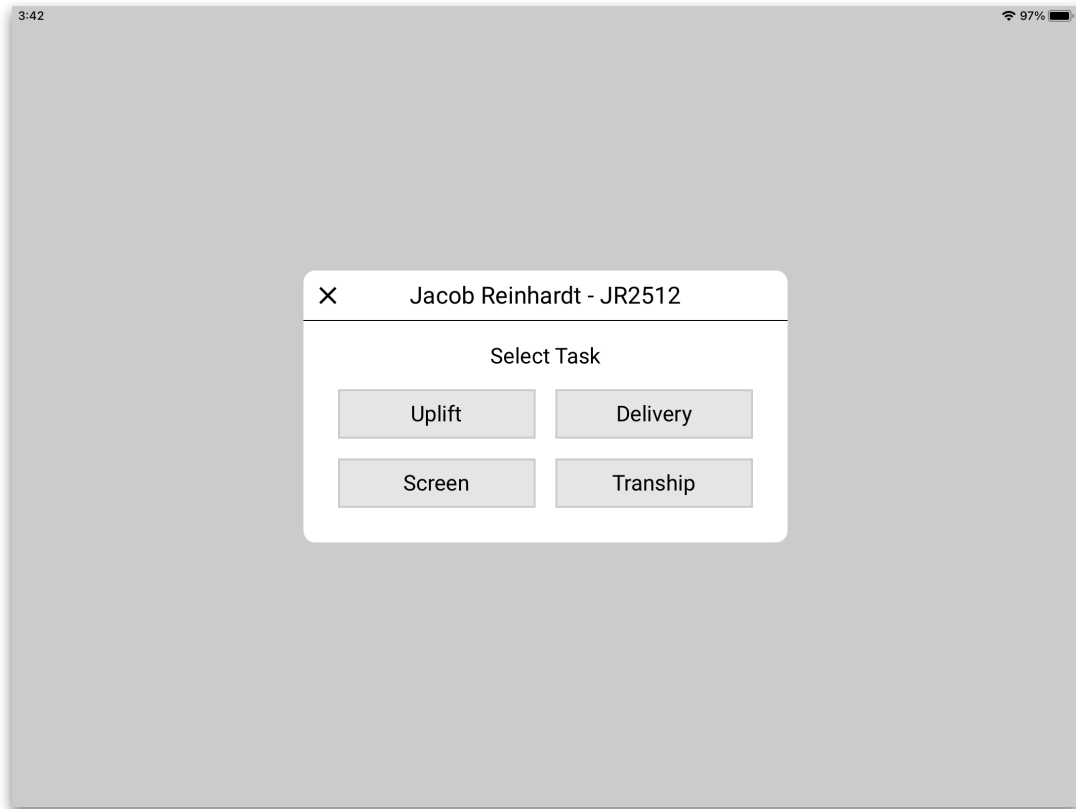

A screenshot of a mobile application interface showing a form titled "Enter Delivery Details". The form has a close button (X) in the top left corner. It contains six input fields: "Name", "Volume", "Phone Number", "Reference Number", "Uplift Address", and "Destination Address". Below these fields are two more fields: "Item Count" and "Screening & Transhipping Required" with an unchecked checkbox. A dark button labeled "Set Up Delivery" is positioned below the "Item Count" field. A black circle with the number "1" and an arrow points to the "Screening & Transhipping Required" checkbox. The background is a light gray with a dark gray border.

1. Select this option if the job needs to be screened and transhipped. Eg. An import job that needs to be checked by customs will need to be screened and items separated when unloading the container.

Kika Basics

Task Screen

- If your job has been set up already, enter the move number at the Move Screen page and you'll be taken to the screen above.
- Select the appropriate task to move on to the next screen.
- The only button that will work will be the task that your move is currently on.

Uplift

Pre Move Checklist

The screenshot shows a mobile application interface for a 'Pre Move Checklist'. At the top, the status bar shows the time 3:43 and battery level at 97%. The app title bar reads 'Jacob Reinhardt - JR2512 - Uplift'. The main content area is titled 'Pre Move Checklist - Uplift' and contains four checklist items, each with an unchecked checkbox:

- Client has given permission to park the truck in the driveway if needed.
- An on site health and safety risk assessment has been carried out by the Team Leader.
- The property has been inspected and any existing damages have been noted and shown to the client.
- Client has read and understood the above statements.

Below the checklist, a note states: 'All notes to be added to Pre Move Comment section.' This is followed by two input fields: 'Client/Agent' and 'Removalist'. Underneath these are two large rectangular boxes, each containing the text 'Sign Here...' in a cursive font and a close button (X) in the top right corner. At the bottom of the form, there are two buttons: a dark grey button labeled 'Pre Move Comments' and a white button labeled 'Submit & Begin ICR'.

- Use the Pre Move Comments section to add anything noteworthy about the job. Eg access or pre existing damages to the property.
- Only attach images when necessary. Uploading too many pictures can make finalising the inventory longer depending on your connection speed.

Note : Pre Move Comments are put in a separate document from the inventory so the client will not see them unless they view it on the tablet.

Uplift

The Package & Carton Screen

3:48 96%

✕ Jacob Reinhardt - JR2512 Save

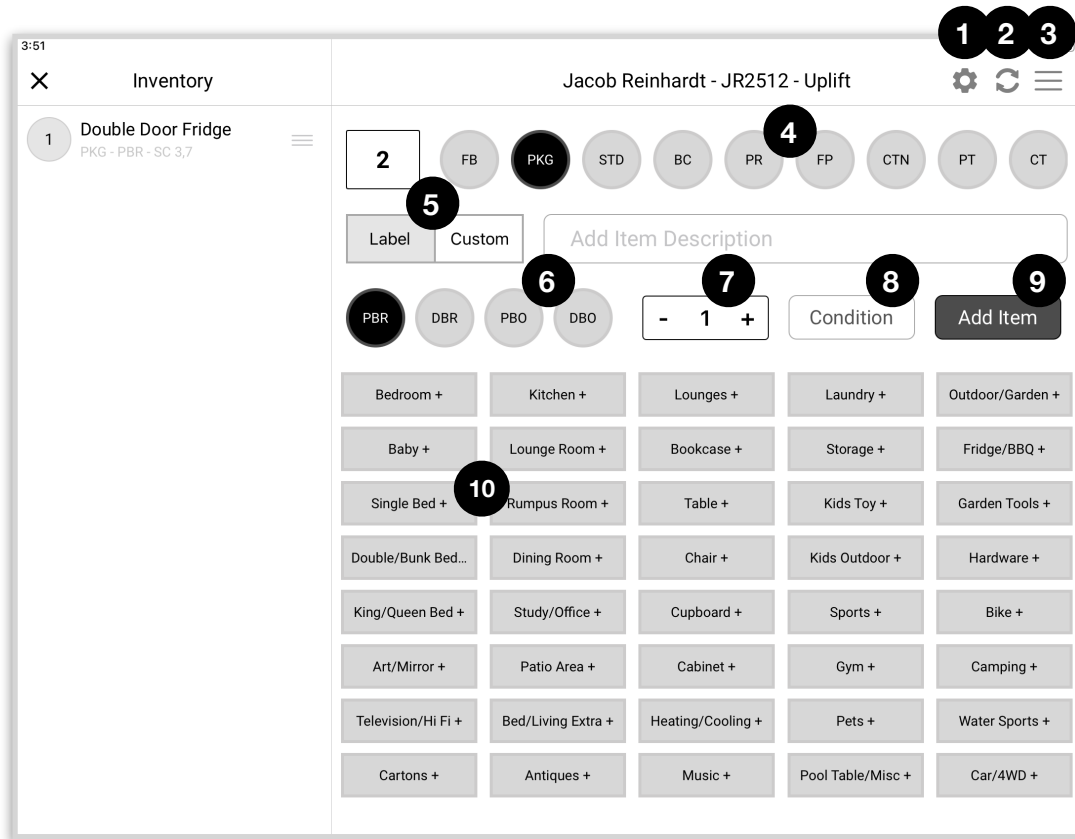

Select relevant package and carton types you use

Furniture Blanket - FB	Package - PKG	Standard Carton - STD
Dishpack Carton - DP	6 cft Carton - 6	5 cft Carton - 5
Crystal Carton - CRC	Medium Carton - MC	4 cft Carton - 4
Book Carton - BC	2 cft Carton - 2	Portorobe - PR
Wardrobe Carton - WR	Flat Pack Carton - FP	Clothes Carton - CC
Carton - CTN	Owner Carton - OC	Plastic Covers - PC
Large Carton - LC	Picture Pack - PP	Wine Carton - WC
TV Carton - TC	Bike Carton - BKC	Crate - CR
Original Carton - ORC	Plastic Tub - PT	Plastic Tote - TT
Archive Box - AB	Document Box - DB	Custom Type - CT

- With so many packages to choose from this screen allows you to only choose the ones that are relevant to your job.
- This screen will only automatically appear once before starting the inventory on your first job. Your selections will be saved on the Main Screen.
- You can return to this screen and change your options at any time.

Uplift

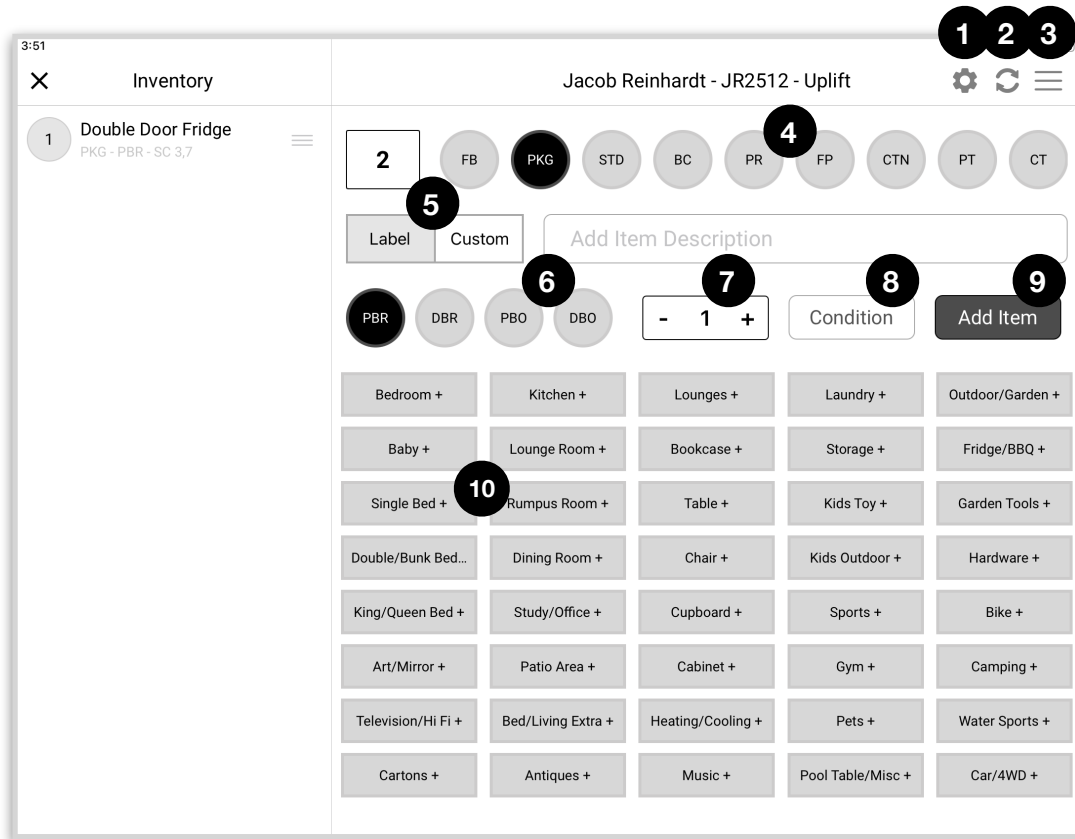

Main Uplift Screen

1. **Package & Carton Screen** : Add or remove package and carton options from the main screen at any time.
2. **Sync Data** : Saves your inventory to the company account. The inventory is automatically saved to the tablet memory until it is finalised so this is not compulsory, however it is good practice to sync the data every now and then.
3. **View & Finalise ICR** : Allows you to view the ICR in a grid style. Tap this button to begin to finalise and submit the inventory.
4. **Package & Carton Buttons** : Tapping these buttons determine what labels are displayed. You can scroll across these buttons if there are too many to fit on the screen.
5. **Label & Custom Button** : Tap the Custom button to manually enter any item that does not have a label. For cartons, type the carton code then the items eg “BC : Star Wars Model”. Return to the labels by tapping “Label” or any of the Package & Carton Buttons.

Uplift

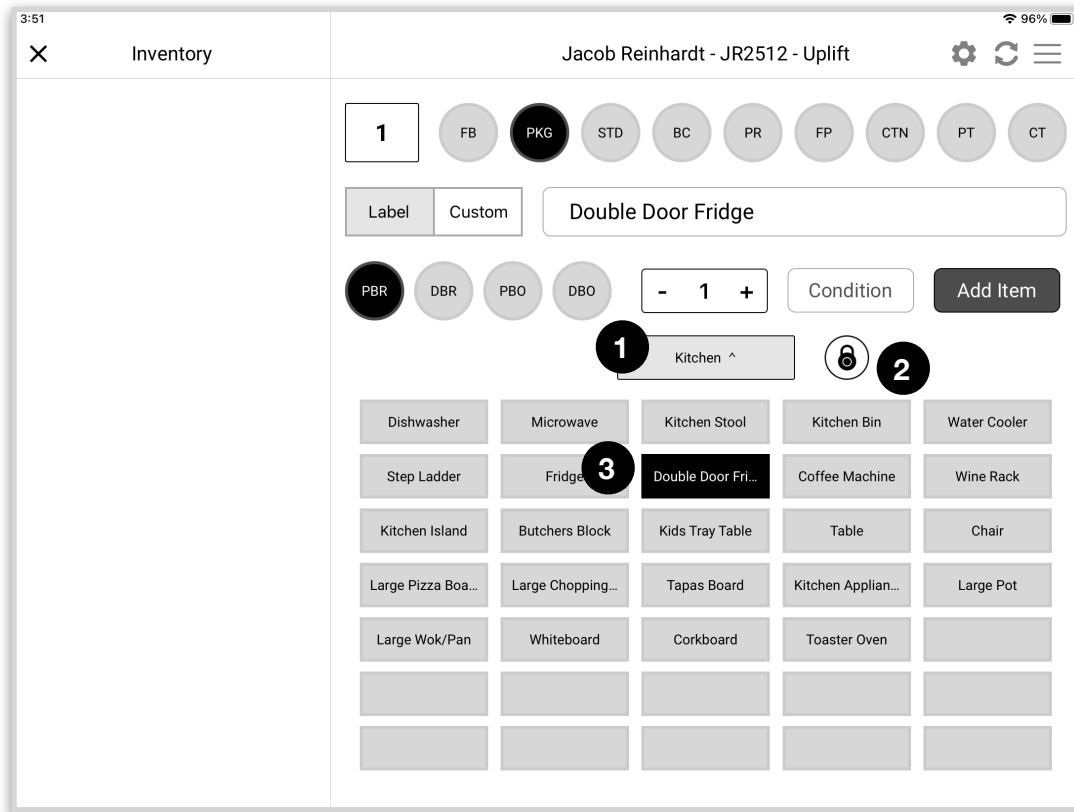

Main Uplift Screen

6. **Packer Code** : Tap the appropriate button that relates to the item being added.
7. **Item Multiplier** : Use the + or - button to adjust the number of items listed. Tap the number (1) to manually add a large number eg 10.
8. **Condition Button** : Tap this to add conditions to the item.
9. **Add Item** : Tap this when the item is ready to be added to the inventory.
10. **Area Labels** : Tap the label that applies to your item. The labels in this image describe the area your item may be located in. Select the area label associated with your item to reveal the labels that are generally found in that location.

Uplift

Labels

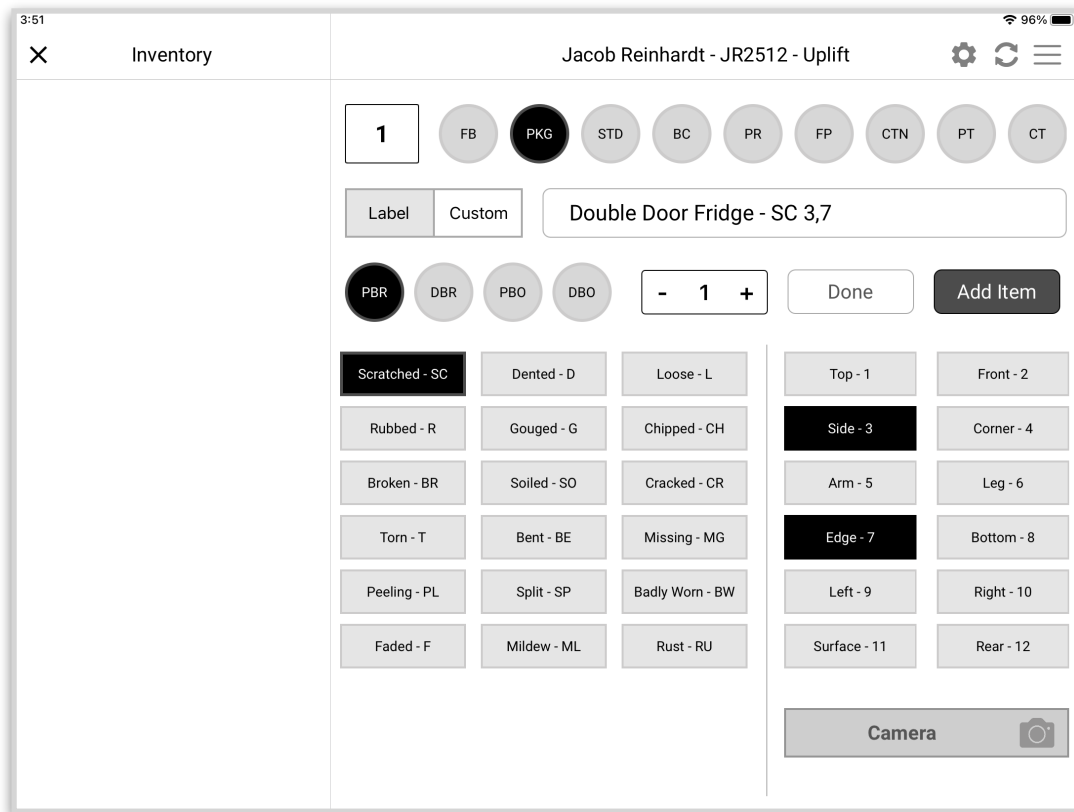

1. **Area Label** : Tap this label in the Main Screen to reveal the furniture labels associated with that area.
2. **Lock Screen** : This locks the screen to this area so the app doesn't take you back to the Main Screen each time you add an item.
3. **Furniture Labels** : Tap these labels to save manually typing the item into the app.

Return to the Main Screen by tapping the Area Label, Lock Screen or by tapping any Package & Carton Button.

A cheat sheet is included at the end of this manual showing how the all the labels are laid out.

Uplift

Adding Conditions

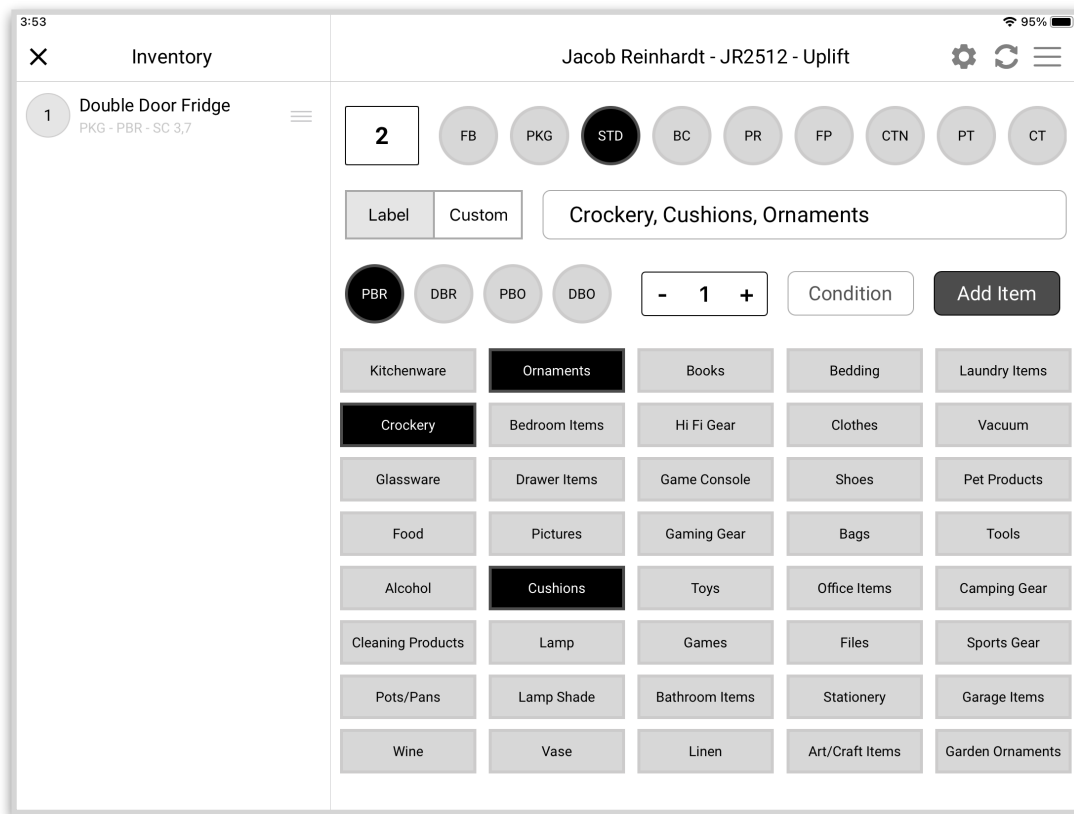

1. Tap “Condition” button on the Main Screen.
2. Tap the combination of labels that describes the condition of the item.
3. Remove condition labels by tapping the defect and location labels again.
4. Tap “Add Item”

Note : The camera button is disabled and will be enabled in a later update.

Uplift

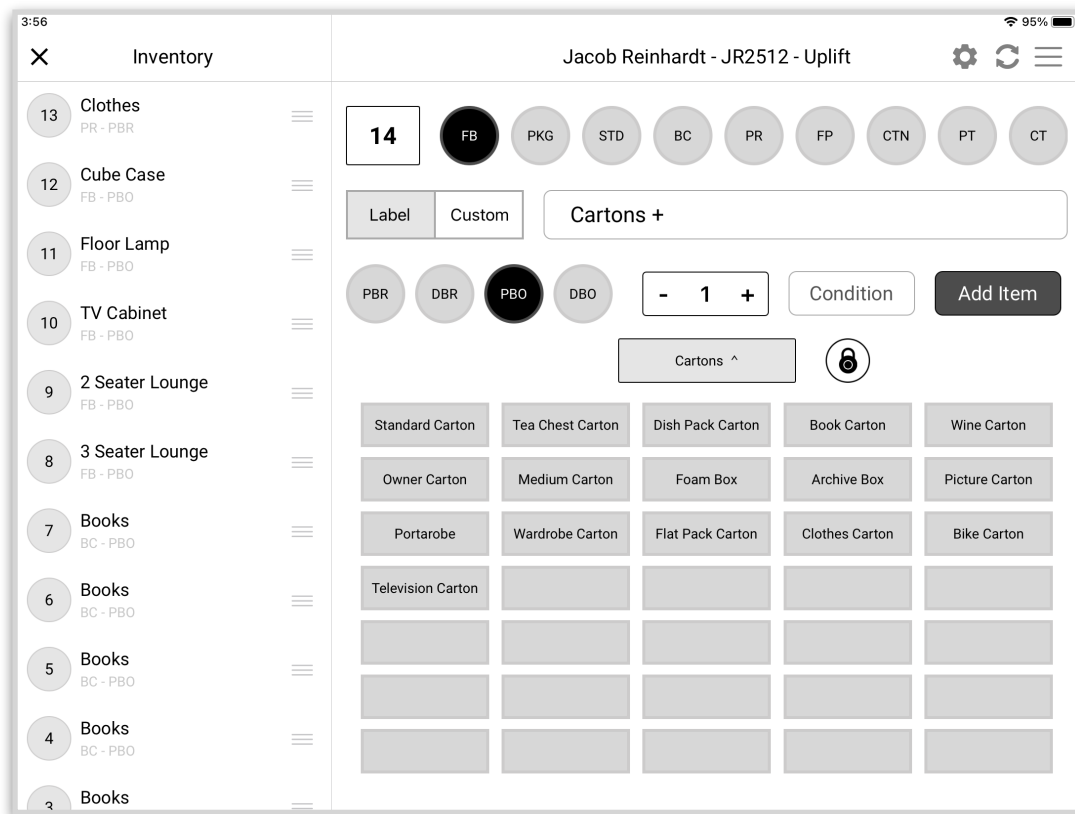

Carton Labels

- Tapping any of the Carton Buttons (eg STD, BC) will show labels that are packed into cartons.
- You can select up to 3 labels per carton added.
- Tap a selected label again to remove it.
- There are 80 different labels to choose from. Scroll down the labels to reveal the second 40 labels.
- Check out the Cheat Sheet at the end of this manual to see them all.

Uplift

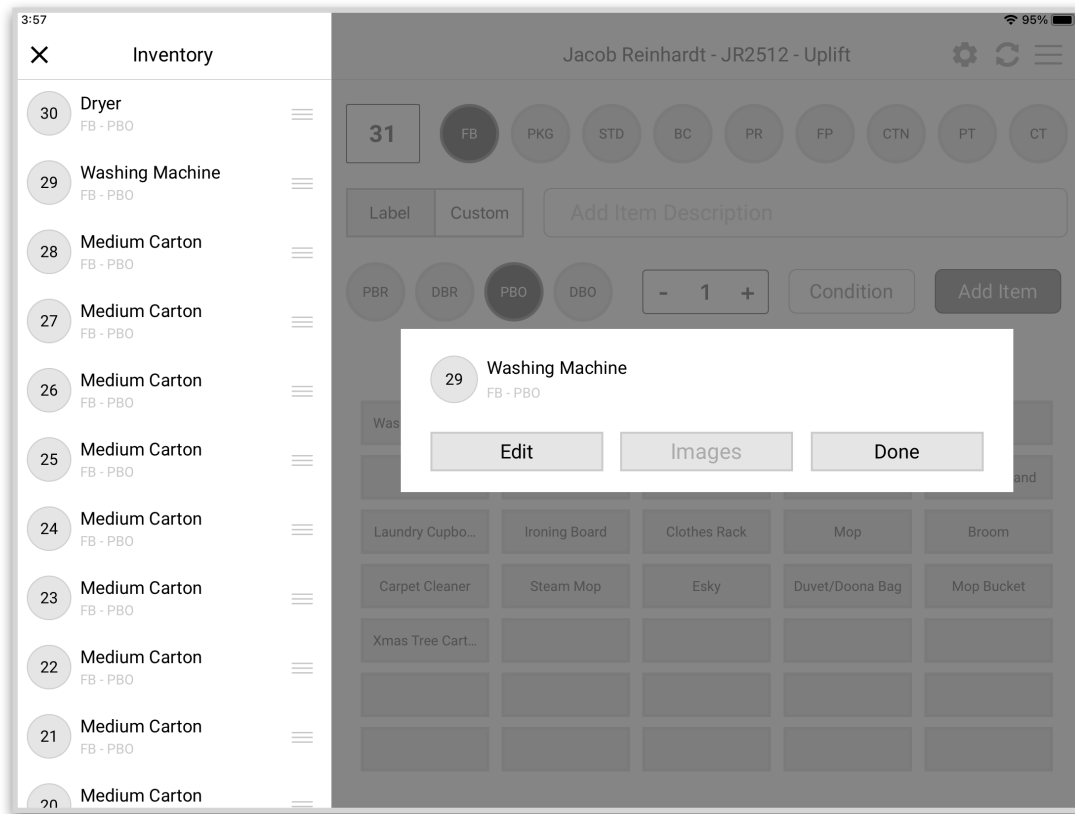

Removal Carton Labels

- To list the type of removal boxes instead their contents (eg some PBO jobs) select the “Cartons” label from the Main Screen.
- The “Cartons” label is located bottom left corner of the Main Screen.
- Use the Lock Screen feature if you have different types of cartons to list in the same number sequence.

Uplift

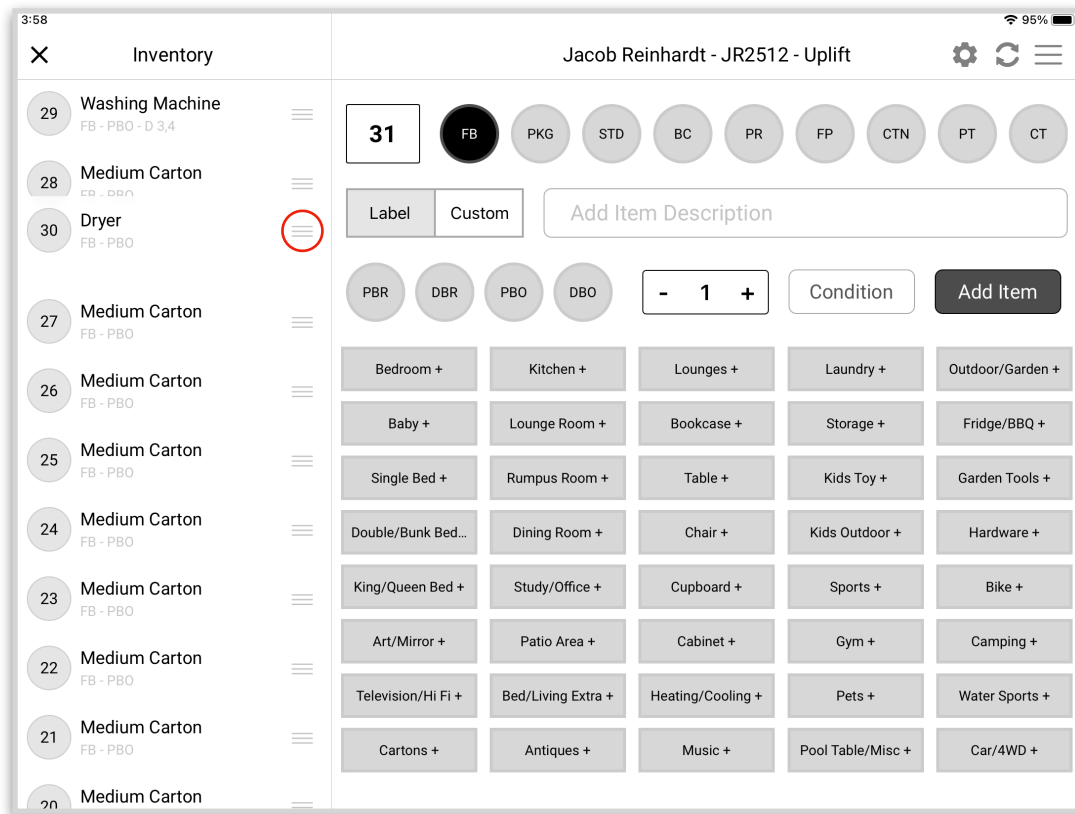

Editing & Voiding an Item

- To edit any item, tap the selected item on the Inventory list, then tap the 'Edit' button on the pop up screen.
- Save that edit by tapping "Edit Item" and adding it to the inventory.
- Another way to edit is to tap the item on the grid of the "View & Finalise" button. Use this way if an item needs to be edited while you're finalising the inventory.
- If the client removes an item that has already been labelled there are 2 ways to edit that item.
 1. Edit item, then tap the 'Custom' button and type 'VOID ITEM' into the description box.
 2. Change that label to 'VOID ITEM' which found in the 'Pool Table/Misc' Area at the bottom left side.

Uplift

The Reorder Function

Forgetting to add an item to the inventory after it's been stickered is a very common mistake.

Fix the issue in two steps :

1. **Add the forgotten item** : In the image above it is No.30 : Dryer.
2. **Force Touch** : Hard press the right side of the item (red circle) and drag it to the correct place in the inventory.

The numbers of all the other items will automatically change to the correct numbers.

You can drag any item to their correct position whenever you need to.

Uplift

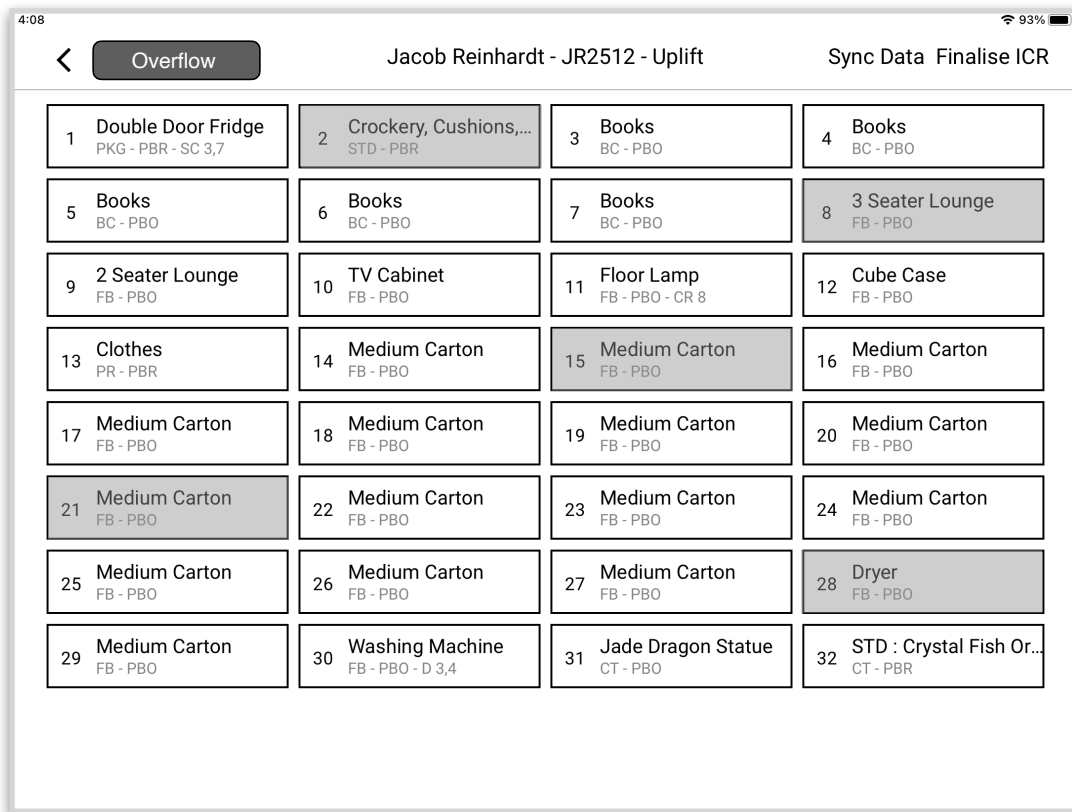

Finalise Inventory

- Tap the **View & Finalise ICR** button on the top right side of the Main Screen to get here.
- The client can review the inventory by scrolling through the items on the grid.
- You can edit items on the grid by tapping on the item and selecting 'Edit'.
- After 'Syncing Data' tap 'Finalise ICR' to move to the sign off page.

Uplift

Listing Overflow Items

- Tap the **View & Finalise ICR** button on the top right side of the Main Screen to get to this screen.
- Tap the 'Overflow' button at the top left corner of the screen to turn this feature on. Tapping it again will turn it off.
- Tap the 'Overflow' items on the grid to turn that label grey.
- Tap 'Sync Data' then 'Finalise ICR' to move to the sign off page.
- The office will receive a separate inventory with a list of Overflow items.
- **Note** : Selecting 'Overflow' will disable the 'Edit' function on the grid. It is important to complete all edits to the inventory **before** listing the overflow items.

Uplift

Sign Off and Submit Inventory

4:08 93%

✕ Jacob Reinhardt - JR2512 - Uplift

The Client/Agent certifies that for this uplift :

- The items listed on the ICR are a true and complete record of what has been uplifted.
- I have made a final check of the property and confirm that all the items have been uplifted.
- The property has NOT been damaged.
- I have read and understood the statements listed above.

This ICR will be emailed to : Optional

Pre Move Comments

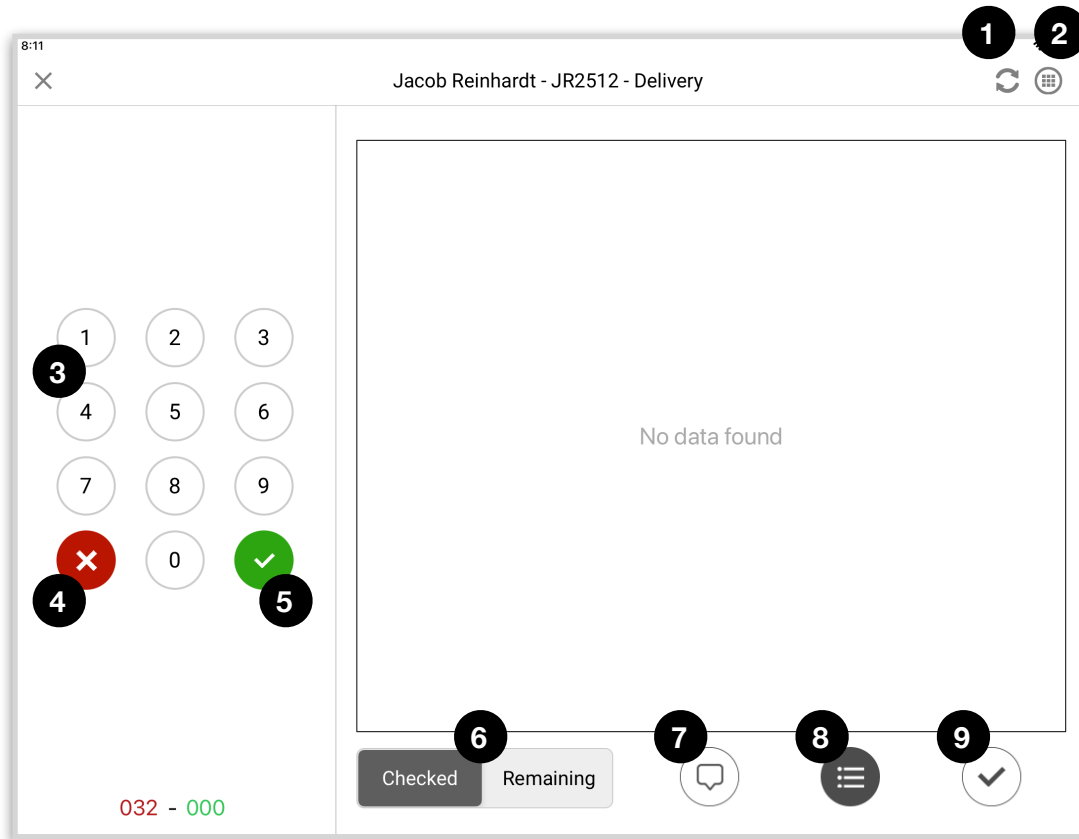

Submit & Begin Delivery

- Use the Pre Move Comments section to add anything noteworthy about the job. Eg access or pre existing damages to the property.
- Only attach images when necessary. Uploading too many pictures can make finalising the inventory longer depending on your connection speed.

Note : Pre Move Comments are put in a separate document from the inventory so the client will not see them unless they view it on the tablet.

Delivery

Delivery Main Screen

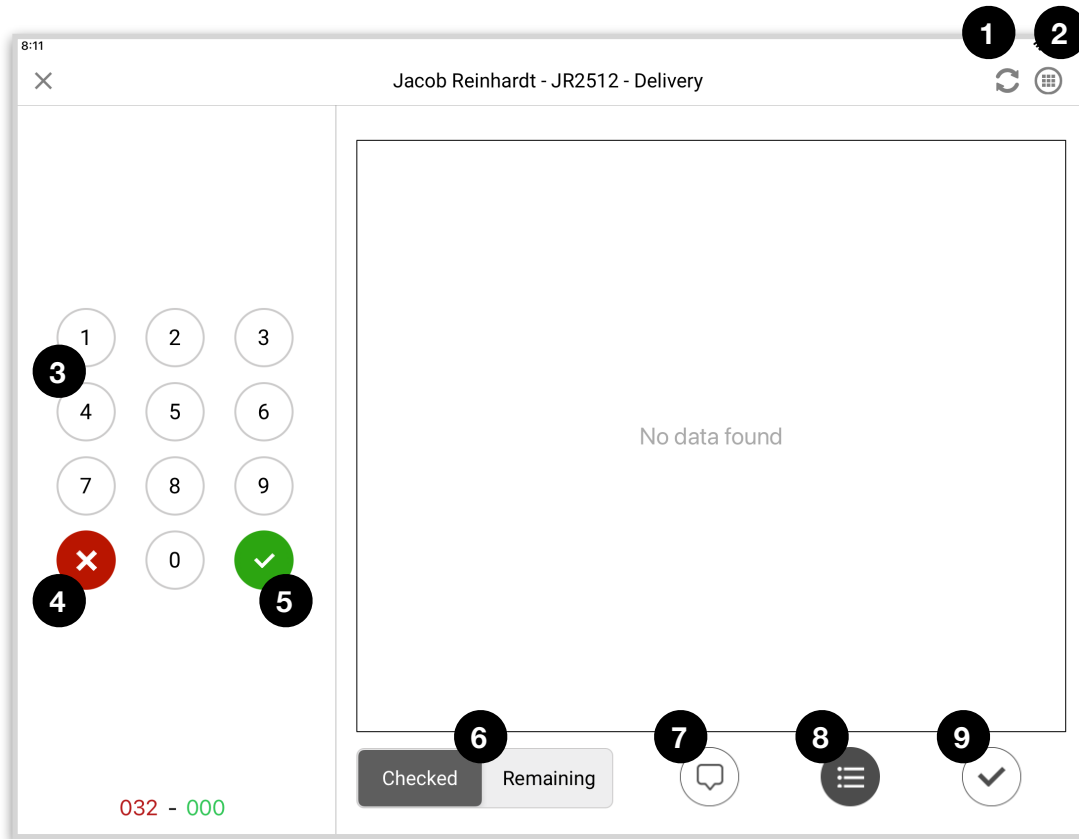

1. **Sync Data** : Saves work done so far to the company account. The inventory is automatically saved to the tablet memory until it is finalised so this is not compulsory, however it is good practice to sync the data every now and then.
2. **View ICR** : Allows you to view the ICR in a grid style.
3. **Numeric Pad** : Use this to enter the number of the item getting checked off.
4. **Clear Button** : Clears the screen if a number needs to be cancelled.
5. **Enter Button** : Tap this button to reveal the item that has been entered. Tap again to check it off.

Important : The 'Enter' button (No.5) needs to be tapped **twice** to check off the item.

Delivery

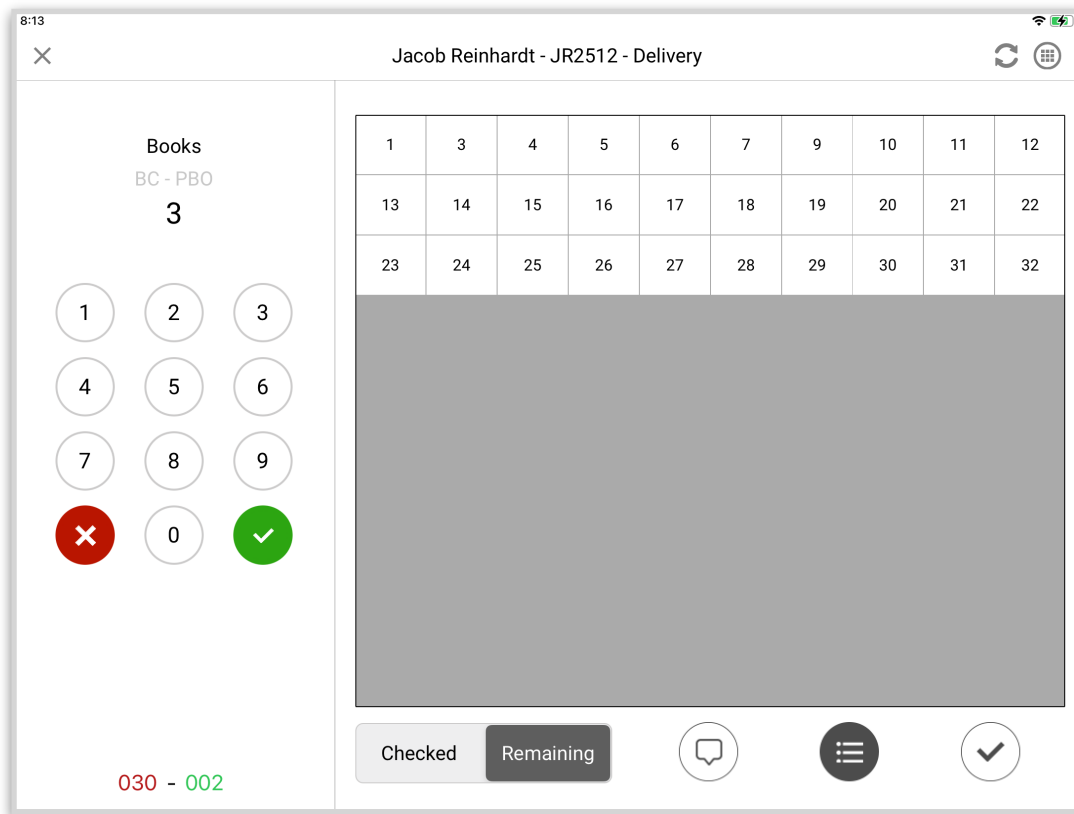

Delivery Main Screen

6. **Checked/Remaining** : Switch between the two to see which numbers have been 'Checked' and which are 'Remaining'.
7. **Condition Button** : Tap this to add conditions to an item that has been damaged.
8. **Number Grid View** : This is the view in the image above. Shows you what numbers have been Checked or are Remaining.
9. **Complete** : Tap this when the truck/container has been emptied. Do this even if there are items still to be checked off. A pop up box will appear to address this issue.

Delivery

Another Way To Check Off Items

1. **Tap** 'Remaining' button on the bottom. This will show the items still to be checked off.
2. **Tap** the relevant number. This will make the description appear on the screen.
3. **Tap** the 'Enter' button to mark off the item.

If item is damaged tap the 'Condition' button and add conditions before you check the item off.

Delivery

Recording Damages

The screenshot shows the 'Recording Damages' interface for item 'Jacob Reinhardt - JR2512 - Delivery'. On the left, a numeric keypad has the number '8' entered. The main area displays a grid of damage labels: Scratched - SC, Dented - D, Top - 1, Front - 2, Loose - L, Rubbed - R, Side - 3, Corner - 4, Gouged - G, Chipped - CH, Arm - 5 (highlighted), Leg - 6, Broken - BR, Soiled - SO, Edge - 7, Bottom - 8, Cracked - CR, Torn - T (highlighted), Left - 9, Right - 10, Bent - BE, Missing - MG, Surface - 11, Rear - 12, Peeling - PL, Split - SP, Badly Worn - BW, Faded - F, Mildew - ML, and Rust - RU. At the bottom, there are 'Checked' and 'Remaining' buttons, a chat icon, a menu icon, and a checkmark icon. The top right has a 'Camera' button and a 'Done' button. The bottom left shows '031 - 001'.

1. **Type** in the item number and tap the 'Enter' button once.
2. **Tap** the 'Condition' button. You will be taken to the screen above.
3. **Select** the required labels.
4. **Tap** 'Done'. You'll be taken back to the main screen and the description screen on the left will show "Comment Noted"
5. **Tap** 'Enter' again to check off the item.

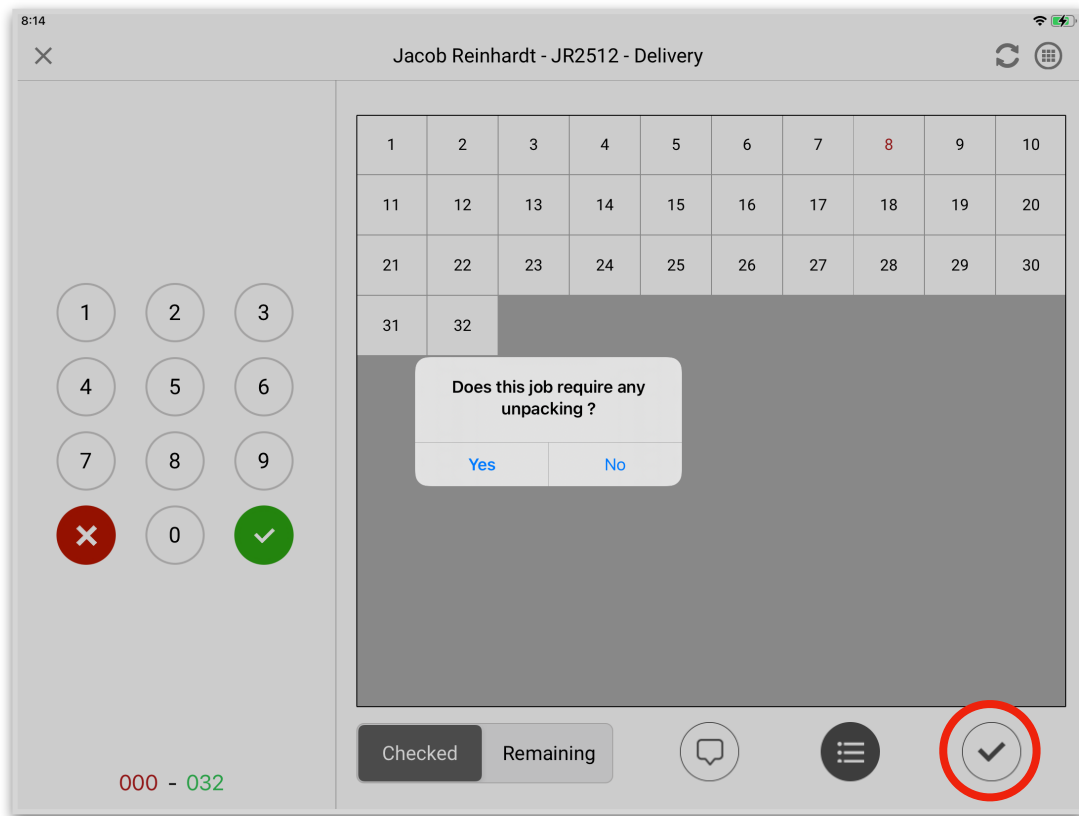

Number will be coloured red in the grid to signal that it has been damaged.

To record damages **after** the item has been checked off :

1. **Tap** the item number (Checked) on the Main Screen.
2. **Tap** 'Edit' on the pop up screen.
3. **Select** the required labels.
4. **Tap** Done.

Delivery

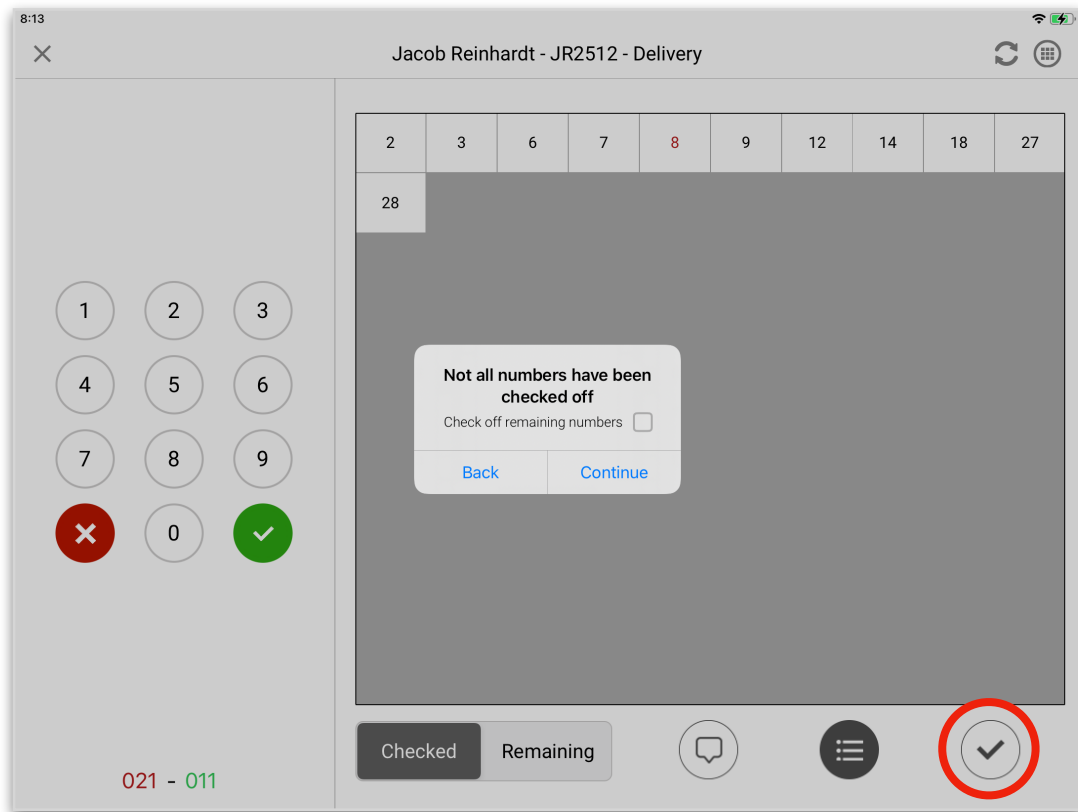

Completing the unload - All items checked off.

1. **Tap** the 'Complete' button on the bottom right corner of the screen.
2. **Select** your unpacking option.
 - **Yes** : You will be taken the unpack screen.
 - All items on this screen are PBR only.
 - Tap the items that have been unpacked.
 - Tap 'Done'
 - A Pop Up screen will appear if there are still items to unpack. Select 'Continue' to move to the sign off page or 'Back' if you still need to unpack.
 - Items not selected on the Unpack Screen will be noted as 'LP' on the inventory.
 - **No** : You will be taken to the sign off page.

Delivery

Completing the unload - Not all Items checked off.

Tap the 'Complete' button on the bottom right corner of the screen.

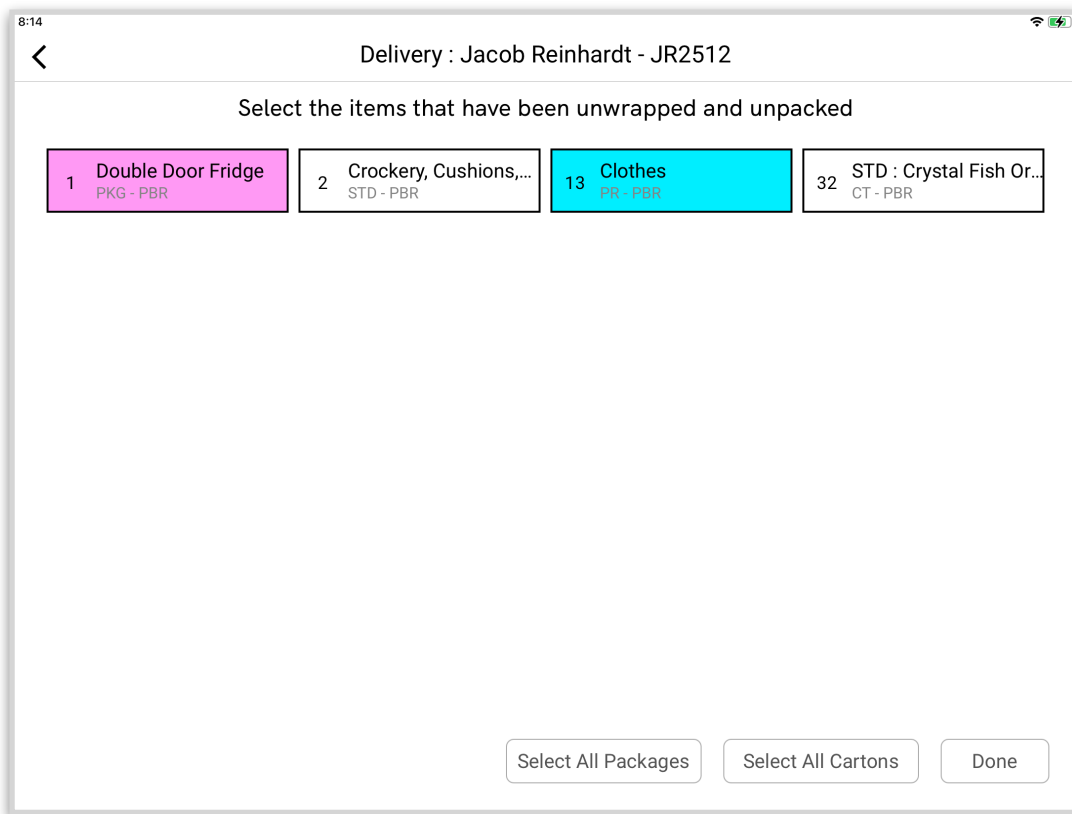

All items that have been checked off will be marked 'X' in the inventory.

Selecting 'Continue' will mean items not checked off will NOT be marked 'X'.

Tap the 'Check off remaining numbers' check box ONLY if all items not checked off have been found. This will mark all those items with an 'X' in the inventory.

Delivery

The Unpack Screen

- The system is able to note what items the delivery crew has unpacked.
- There is a notification regarding this after the truck has been uploaded and the 'Complete' button has been tapped.
- PBR Packages and Cartons are displayed in the Unpack Screen.
- Tap the items that have been unpacked or unwrapped.
- Items that have NOT been unwrapped or unpacked are marked as 'LP' (left packed) on the delivery inventory.
- The number of cartons and packages that have been left packed is noted in the sign off section when the client finalises the delivery.

Delivery

Finalise & Submit Inventory

8:15

Jacob Reinhardt - JR2512 - Delivery

Cartons Left Packed : 1 Packages Left Packed : 1

I certify that for this delivery :

- All items have been delivered as per the Inventory and Condition Report.
- Any damages or items not delivered have been noted.
- The unpack and general set up has been completed to my satisfaction.
- The property has NOT been damaged.
- I have read and understood the statements listed above.

This delivery report will be emailed to : Optional

Add Comment Finalise & Submit Delivery

- Any necessary comments for the job can be added in the Post Move Comments. These comments will be part of the ICR document so the client will be able to see them.
- If required enter the client's email address in the field next to "This ICR will be emailed to :". Let them know that the inventory will be sent from 'Kika Moving' and to check their junk mail as well.
- Tap 'Finalise & Submit Delivery' to complete the uplift.
- The app will take you to the Move Screen when it has completed uploading.
- See what the Delivery ICR looks like on page 55.

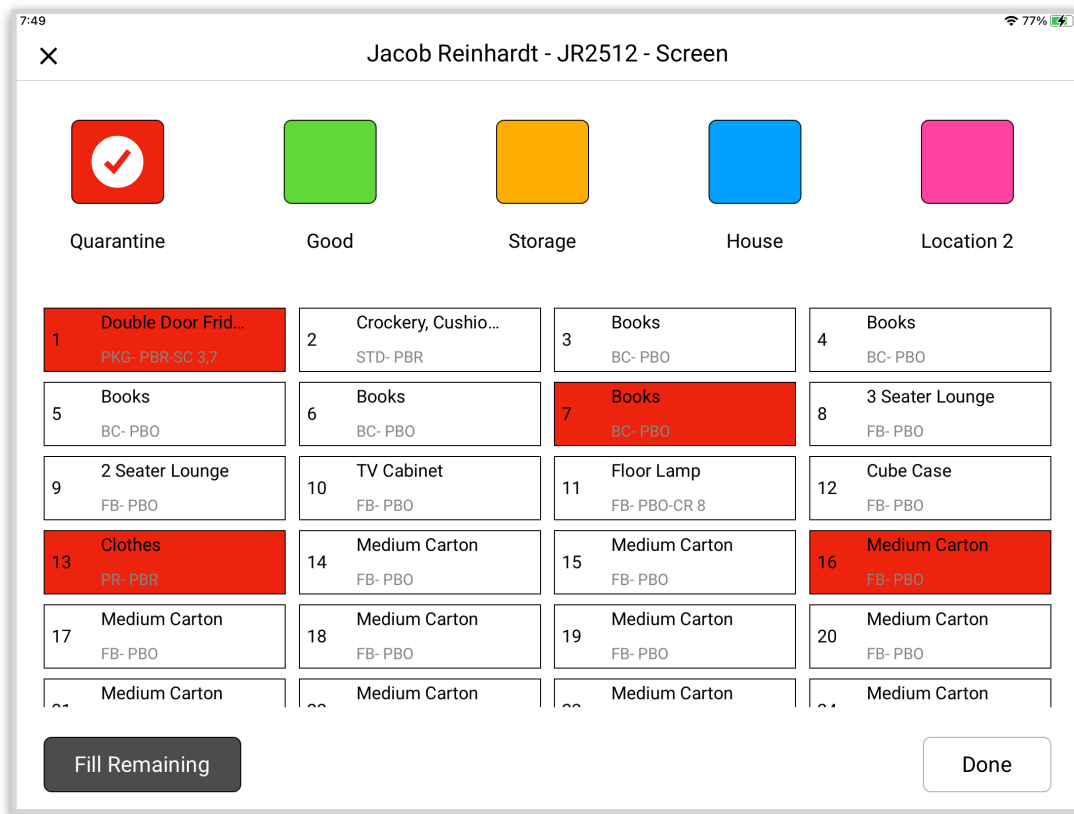

Delivery

Completing a Delivery Outturn Report for Non Kika Jobs

- Kika can complete delivery outturn reports for inventories that have been done on paper.
- The process is exactly the same as doing the Delivery task with jobs that have been invented on Kika.
- The only difference is that there will be no item description above the numeric keypad when item numbers are entered.
- The 'Enter' button has to be tapped **TWICE** to check off the item.
- You can select the 'Remaining' button and check the numbers off by tapping the relevant number.
 1. Select 'Remaining'.
 2. Tap the relevant number.
 3. Tap the 'Enter' button on the numeric pad to check it off.
- Record damages to items by using the same process as when you are doing a normal delivery on with the inventory created on Kika.
 1. Before clearing the number tap the 'Condition' button.
 2. Select the relevant damage labels.
 3. Tap 'Done'
 4. Tap 'Enter' button to check off item.
- See what this Delivery Outturn Report looks like on page 55.

Screen

Separating The Inventory

Enter the move reference number then select 'Screen' to get here.

- Tap the category you are selecting. In the case above that is 'Quarantine'.
- Tap the items that are for 'Quarantine'.
- Tap selected times again to remove them from that category.
- Select other categories and repeat where necessary.
- Tap 'Done' to complete.

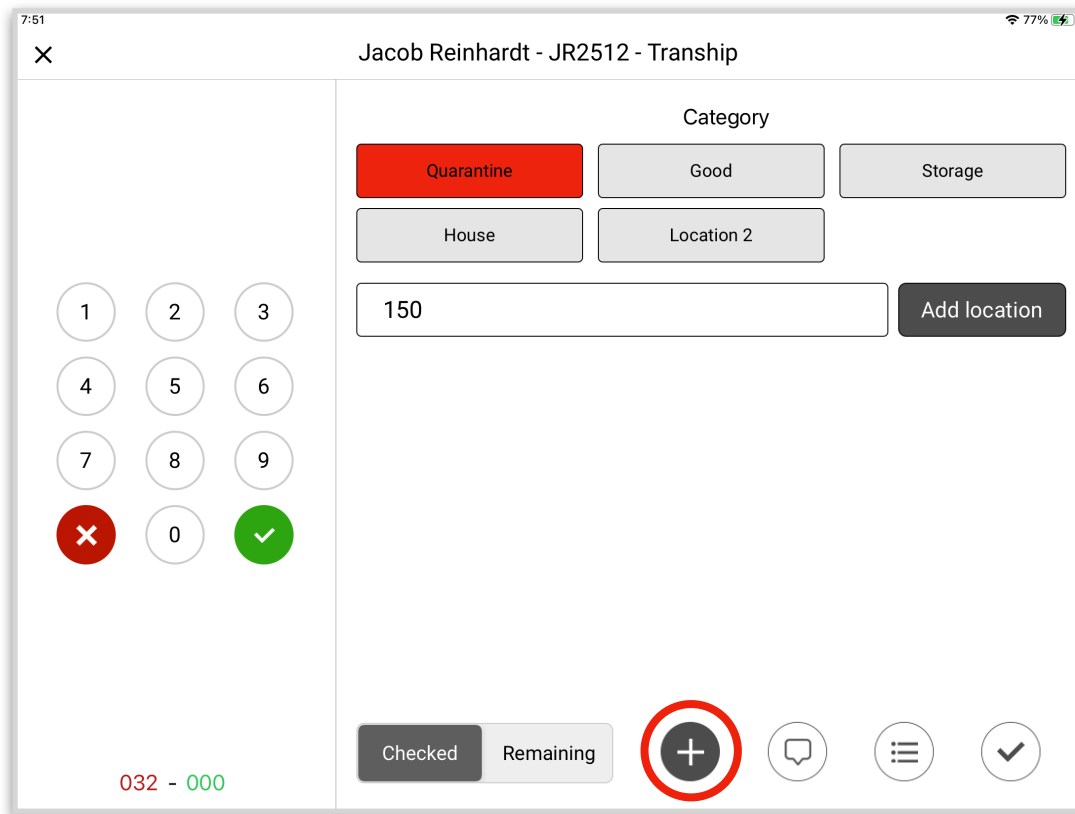

Screen

Separating Non Kika Jobs

- Kika can complete delivery outturn reports for inventories that were not done on Kika.
- The process is exactly the same as doing the Screening task with jobs that have been invented on Kika.
- The only difference is that there will be no item description above the numeric keypad when item numbers are entered.
- Use the printout of the inventory and screen the item according to its number not description.
 - eg. The inventory printout indicates that No. 12 is a Lawn Mower which needs to go in the 'Quarantine' category.
 - Select 'Quarantine' from the Categories listed.
 - Tap No.12 to ensure that number is displayed as 'Quarantine' when the Transhipping task is done.

Tranship

Setting up the Modules/Containers/House Packs

From the Move Screen :

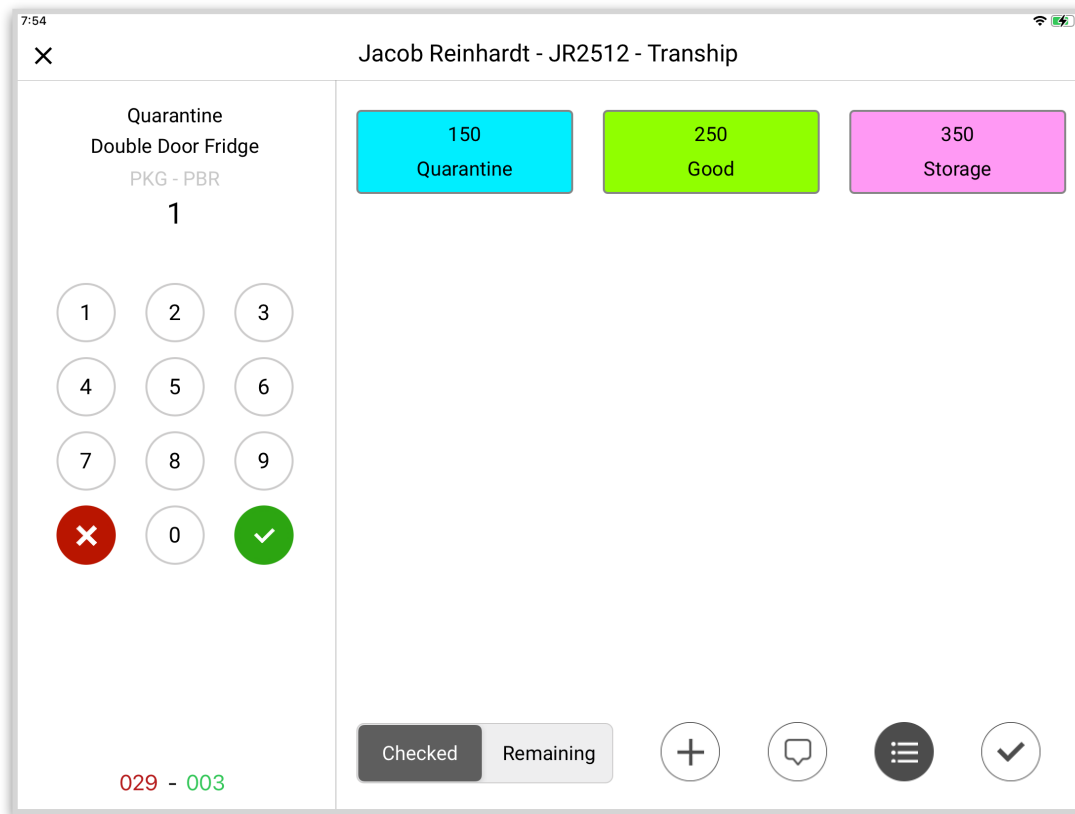

1. Enter the move reference number.
2. Select 'Tranship'
3. Follow the prompts

When you get to the Category Screen (image above) :

1. Select your category. In this case it's Quarantine.
2. Type in the location number. In this case it's 150.
3. Tap 'Add location'.
4. You will be taken to the Main Tranship Screen.
5. Tap the + button to be brought back to the Category Screen to add more locations.

Tranship

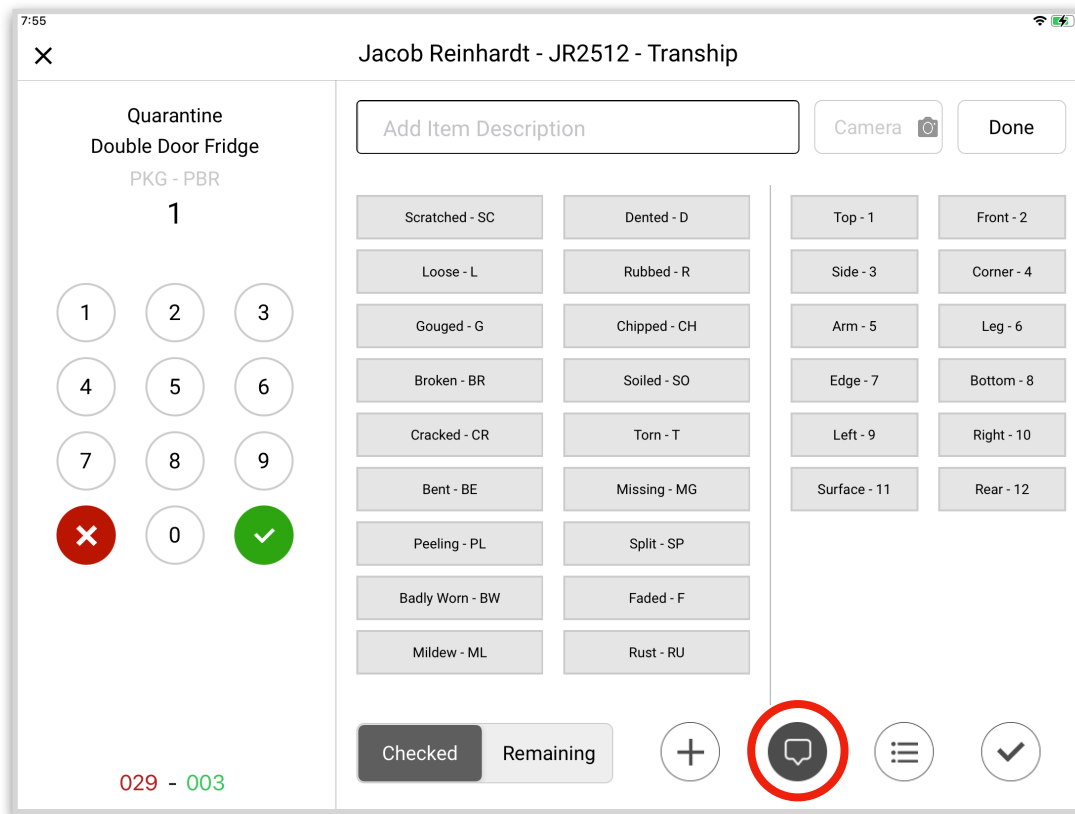

Main Tranship Screen

- The numeric pad area is used the same way as the Delivery task.
- After entering the number you'll see the item and the category displayed after you tap the 'Enter' button
- Tap the category the item belongs to (in this case Quarantine) and the item will be cleared from the screen and placed in that location.

Tranship

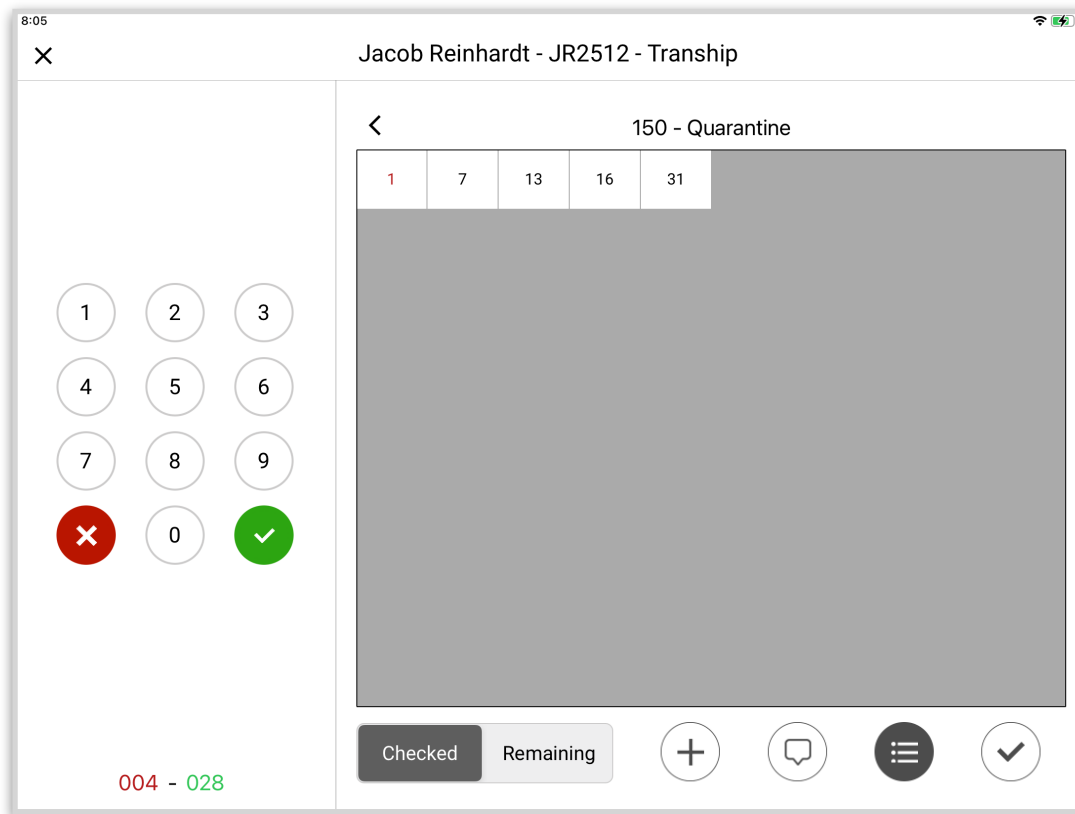

Recording Damages

1. **Before** placing the item in its category tap the 'Condition' button (right side of the + button).
2. **Tap** the relevant damage labels.
3. **Tap** 'Done' and you'll be taken back to the Main Screen with 'Comment Noted' under the item description.
4. **Tap** the correct category to place that item in that location and clear the screen.

Tranship

Viewing Numbers in Categories and Changing Locations

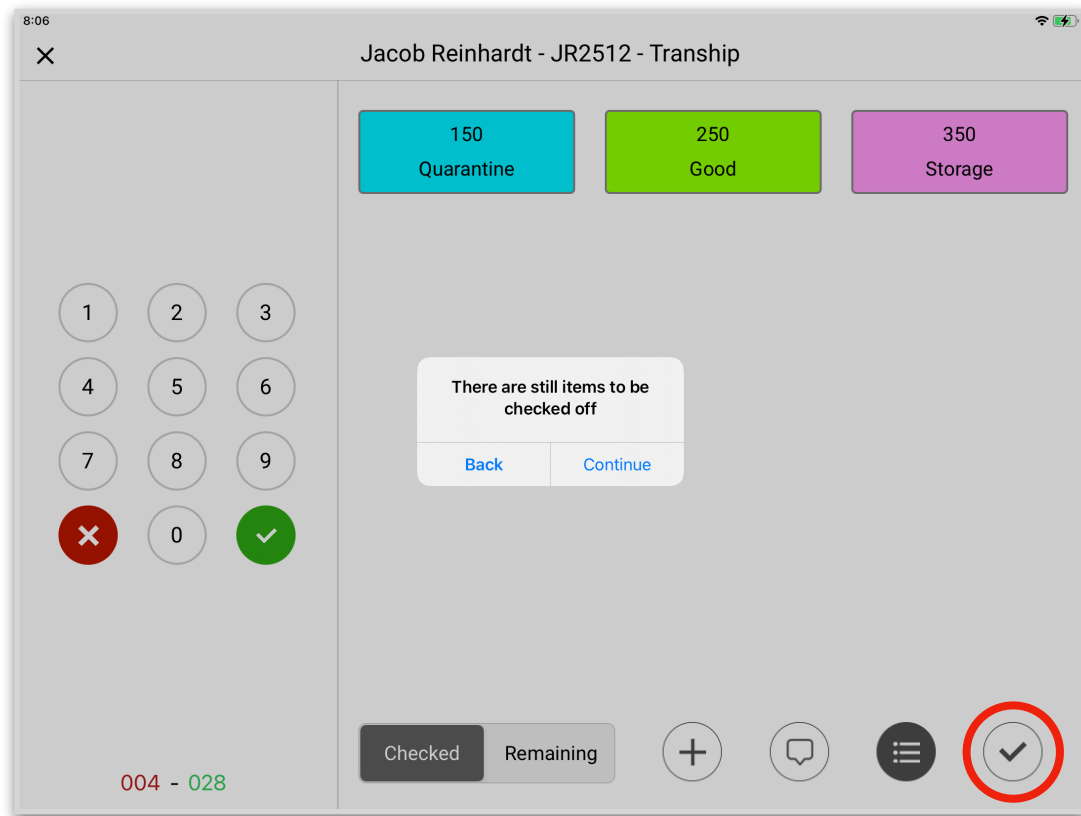

- To view what numbers have been placed in specific locations, tap that location on the Main Tranship Screen. Note : The numeric pad display on the left must be cleared first.
- The numbers displayed are the checked items in that location.

To change the location of an item that has already been checked :

1. Tap the item number when viewing the items in that location (above image). Red number signals that item has been damaged.
2. Select "Uncheck Item" from the pop up screen.
3. Reenter that number into the numeric keypad.
4. Place item in new location by tapping the new category/location.

Tranship

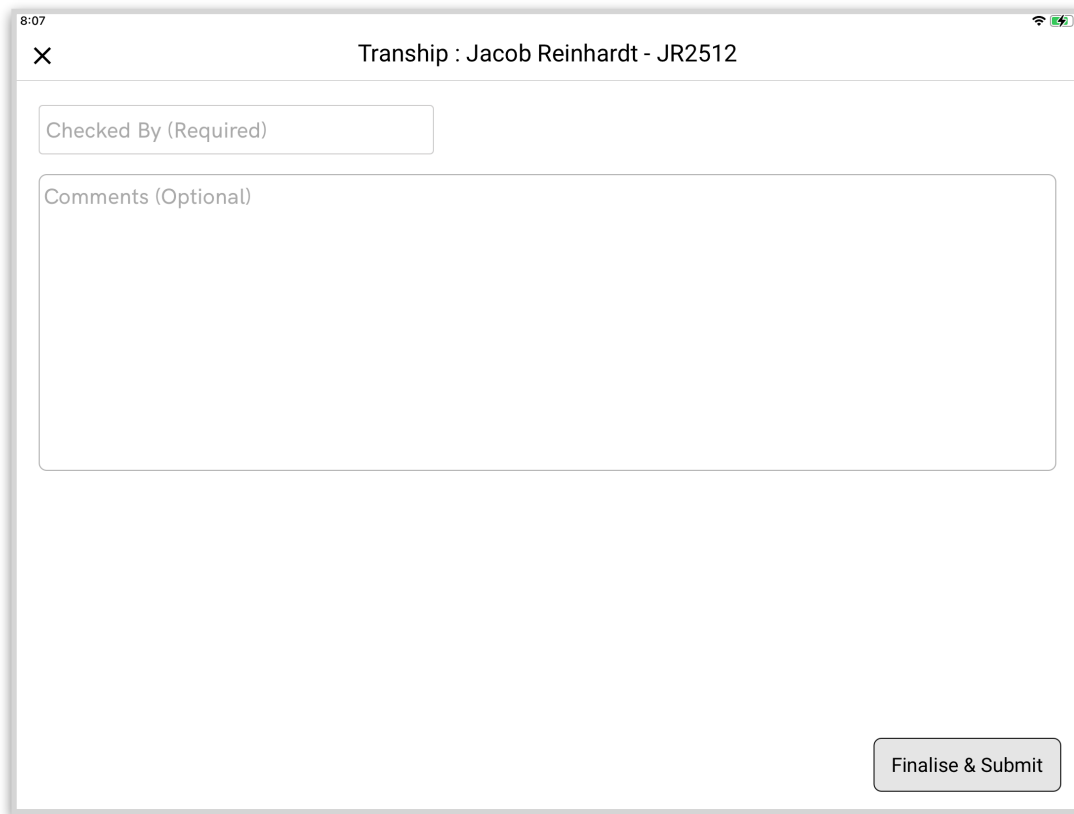

Completing the Tranship

- Complete the Tranship by tapping the 'Complete' button (bottom right).
- If all items have been checked off, fill in the required field then tap 'Finalise & Submit'.
- If not all items have been checked off, a pop up message (above image) will appear.
 - Select 'Back' to continue the Tranship process.
 - Select 'Continue' to move on to the final screen.
- Selecting 'Continue' if there are still items to be checked off will mean those numbers will not be marked as being unloaded on the Tranship Sheet.

Tranship

Finalising the Tranship

The screenshot shows a mobile application window titled "Tranship : Jacob Reinhardt - JR2512". The interface includes a close button (X) in the top left corner. Below the title bar, there is a text input field labeled "Checked By (Required)". Underneath this is a larger text area labeled "Comments (Optional)". At the bottom right of the form, there is a button labeled "Finalise & Submit". The top status bar of the phone shows the time as 8:07 and battery level at 64%.

- The person who checked off the items must type in their name.
- Comments regarding the tranship are optional.
- The Tranship Sheet that the office receives will have a numbered grid that will be coloured to signal what module/container/house pack that item is in. All damages and comments will be displayed at the bottom of the sheet.
- See what the Tranship Sheet looks like on page 53.

Tranship

Transshipping Non Kika Jobs

- Kika can complete the Transshipping task for inventories that weren't done on Kika.
- The process is exactly the same as doing the Transshipping task with jobs that have been invented on Kika.
- The only difference is that there will be no item description above the numeric keypad when item numbers are entered.
- After the job has been Screened enter the Move Reference Number in the Move Screen and follow the prompts.
 - Create the relevant Categories and Locations.
 - Follow the same process as you would when Transshipping a job created on Kika.
- Record damages to items by using the same process when you are doing a normal Kika Transshipping task.
 1. Before clearing the number tap the 'Condition' button.
 2. Select the relevant damage labels.
 3. Tap 'Done'
 4. Tap 'Enter' button to check off item.
- The Tranship Sheet will list the damaged items in the comments. The item will be identified by its number.
- The Tranship Sheet for a Non Kika job look the same as a normal Tranship Sheet.
